ROBE®

welcome

Welcome to Robe's amazing LEDWash series

introducing **ROBIN® 300 LEDWash**, **ROBIN® 600 LEDWash** and **ROBIN® 1200 LEDWash** fixtures.

By waiting for the right multichip technology to become available, Robe has produced the finest quality engineered LED wash units currently on the market. Utilising fully refined and homogenised light engines, incredible intensity is combined with ultra smooth dimming, offering a full range of true whites in addition to fabulously delicate pastels and rich primaries.

The LEDWash series offers three conveniently sized options to suit all applications - from live events to installations. We hope you appreciate will the pop-up art design of the brochure and find it as imaginative and fun as actually using the LEDWash series!

ROBIN® 300 LEDWash

ROBIN® 600 LEDWash

ROBIN® 1200 LEDWash

The luminaires, with their a unique set of LED rings have been designed as funky, eye-catching effects unit - as well as a bright, highly practical, low-power option for wash lighting. (High light output and low-power consumption).

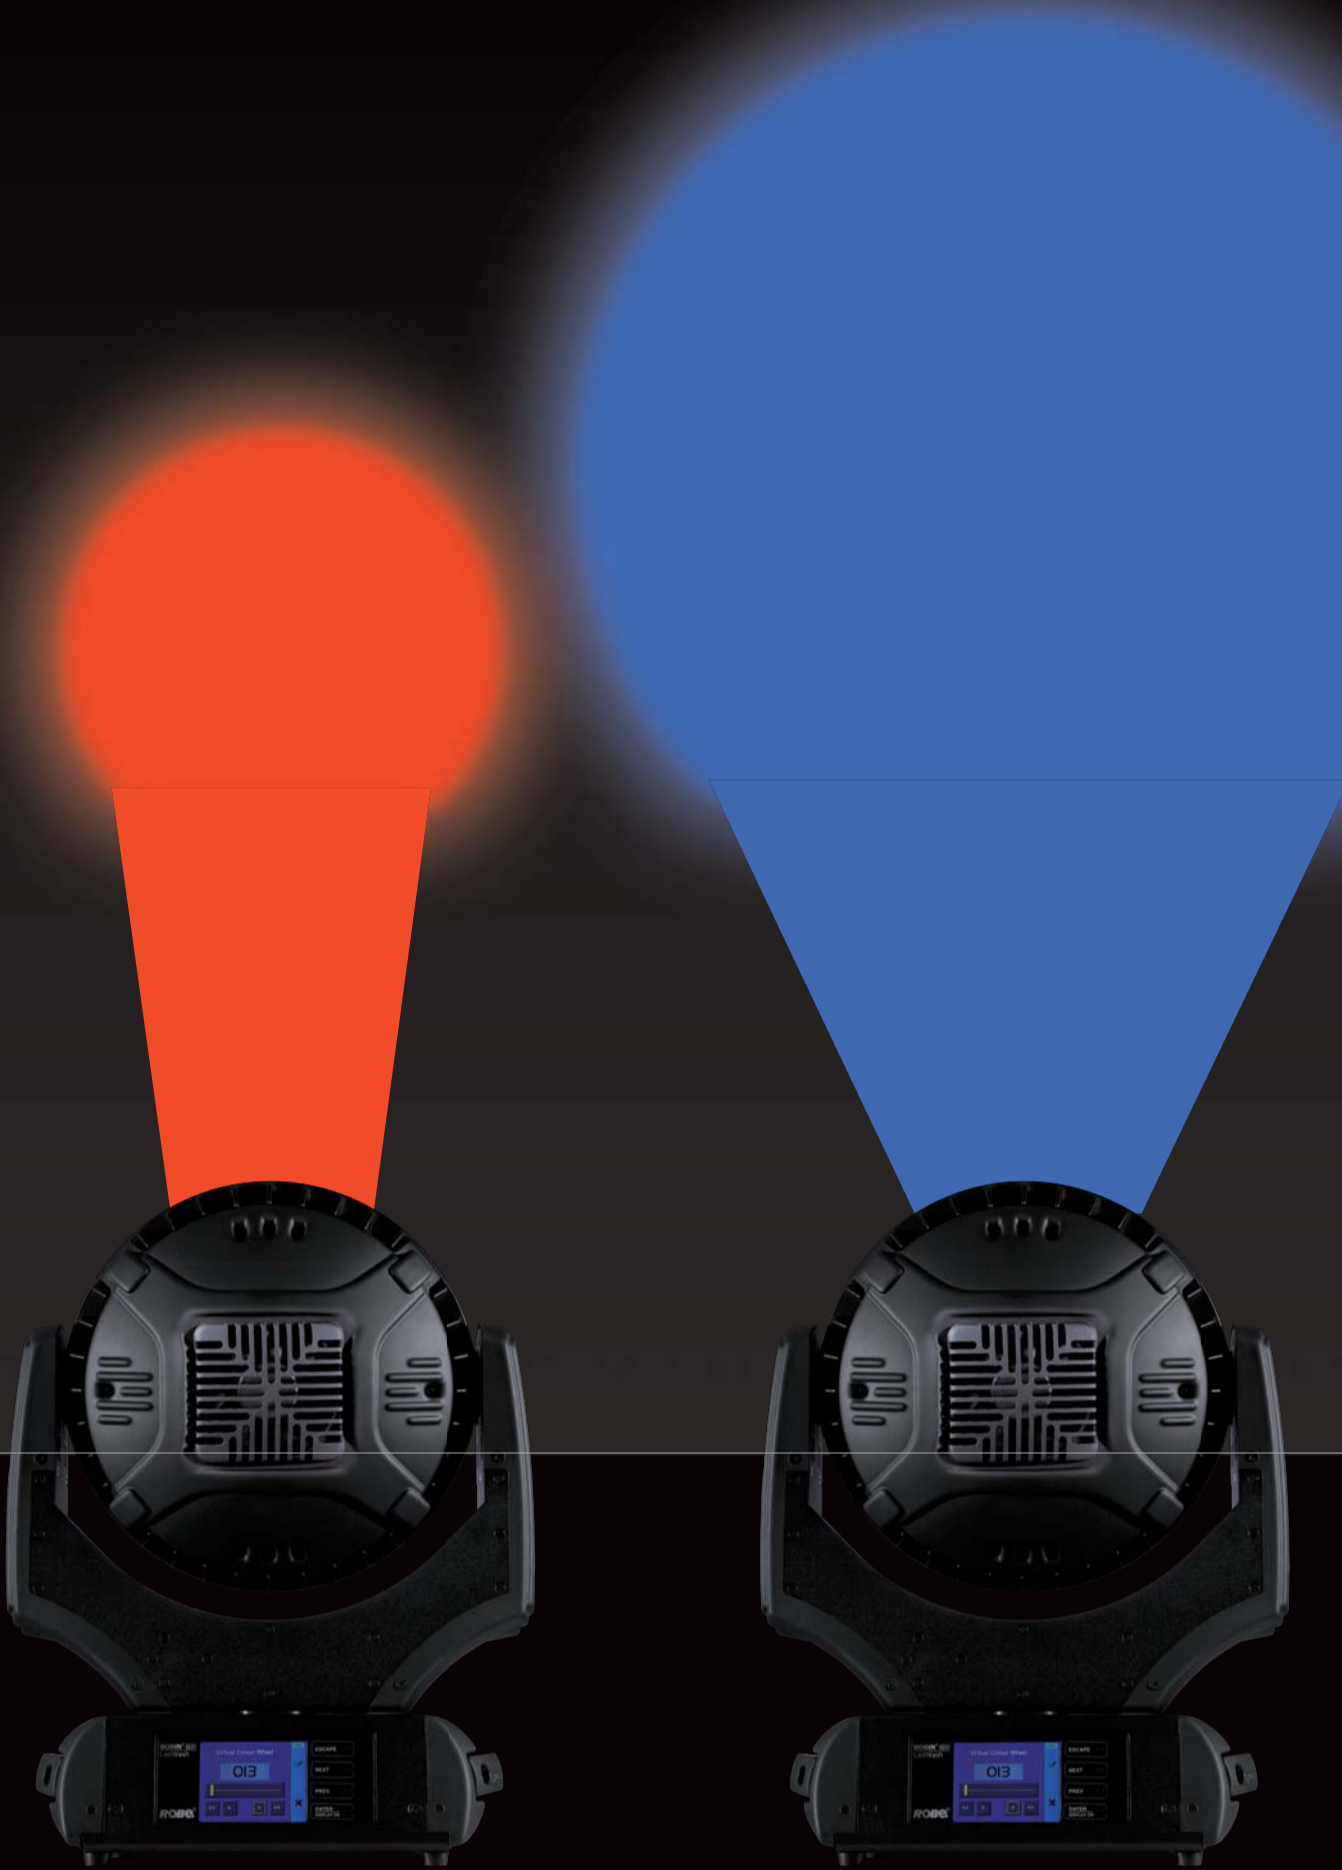

The LEDWash is central to Robe's "Think of the Future - Consider Nature" philosophy, and the company's commitment to producing **smaller-lighter-brighter** and genuinely greener and more environmentally sustainable products, both in terms of their ongoing operational functionality and in the manufacturing process.

Robe's ROBIN 600 LEDWash, launched at PLASA 2010 is the brand's fastest selling product ever to date. This was followed by the ROBIN 300 LEDWash for smaller spaces and places and now the mega-bright ROBIN 1200 LEDWash.

Explore, experiment, enjoy...

Linear zoom

Linear motorized zoom

The unique **15–60 degree zoom range** provides the best possible performance fulfilling the tough requirements of high quality colour-mixing (very smooth, homogenized colour output in pastels and whites). It is also ideal for defining the output shape with a well contoured wash beam, eliminating halos and other light spill.

LED colour variants

NEW LED technologies use several LED chips on a single module that creates just perfect point source

of extremely smooth new dimensional colour mixing of RGBW. Unique design and control of the LED PCB's allows individual control of each LED ring for creation of eye-candy effect, such as colour waves or strobing per rings (Patent pending).

Robin LEDWashes are able to produce 4300 from pastel to saturated colours.

Pure Whites

Spotlessly even light output of the highly popular ROBIN® 600 LEDWash comes in a PureWhite version, offering smooth output of white only variations. There are 3 versions - **DayLight** (6.300 K), **WarmWhite** (3.000 K) and **SmartWhite** which is variable from 6.300–2.800 K. The 10 W Cree LED multichips are arranged in 3 concentric rings for providing comprehensive and perfectly even wash coverage, ideal for car shows, theaters and thank to flicker free LED operation also for TV studios.

Fast 15–60 degree motorized zoom, speedy pan and tilt movement and powerful fast strobing with pre-programmed strobe effects of all LEDs or per each individual ring can turn this wash unit into very effective blinding tool.
