Cyclone nominated for 2014 Parnelli Award

Products Involved

Cyclone™

Robe's unique Cyclone fixture has been nominated for a 2014 Parnelli Award ...
in the 'Indispensable Technology in Lighting category.

US based LD Scott Warner originated the concept of the Cyclone, which Robe developed and put into production ... as a high-powered LED wash light with inbuilt DMX-controlled fan, integrating lighting - via a ring of individually controllable 24 RGBW multichip LEDs - with effects via the fan!

This hugely inventive tool that can be used for creating way-cool atmospheric visual effects and has been recently used for the season opening match of the Pittsburgh Penguins NHL team amongst others!

The Parnelli Awards – described as the Oscar of the live event industry - recognizes pioneering, influential professionals and their contributions, honouring both individuals and companies! The annual gala ceremony takes place in Las Vegas on Nov 22nd.
